

| Symposium title | Organizer(s) | Co-organizer(s) |
|---|--|---|
| Seed dispersal ecology in Madagascar's forests: Advances and future directions | Onja H. Razafindratsima | Nancia Raoelinjanakolona and Hiroki Sato |
| Broad-scale determinants of tropical diversification and community assembly | Renske E Onstein | Christopher D. Barratt |
| Role entomological surveys and systematics for conservation action in the | Brian L. Fisher | Christiane Weirauch |
| Functional responses to changing environments | Maria Natalia Umaña and Natalia Norden | |
| Restoration of Tropical Forests: Lessons from Madagascar and beyond | Robert Kooyman | Chris Birkinshaw |
| Monitoring the forest cover: Tools for managing natural resources | Lucienne Wilmé | Patrick O. Waeber |
| Restoring 100 million hectares in Africa by 2030: Goals, lessons and challenges | Edu Effiom | Robin Chazdon and Tuyeni Heita Mwampamba |
| Tropical biome responses to global change: Integrating empirical data and models | Alexander Cheesman | Stephen Sitch and Lina Mercado |
| Telecoupled land use change in Madagascar – implications for conservation and sustainable development | Julie G. Zaehring | Jorge C. Llopis and R. Ntsiva N. Andriatsitohaina |
| The challenge of connectivity in a fragmented world – insights from Malagasy Forests | Ute Radespiel | Lounès Chikhi and Guillaume Besnard |
| Large-scale ecosystem manipulation experiments as a way forward to tropical vegetation ecology | Sabrina Garcia | Tomas Domingues and Kelly M Andersen |
| Defaunation effects in tropical ecosystems | Onja H. Razafindratsima | Mauro Galetti |
| Conservation in Madagascar: Threats and opportunities | Rhett Butler | Lucienne Wilmé |
| Biodiversity management and development: Challenges, opportunities and new directions | Fabien Quétier | Daniela Antonacci and Alexia Aussel |
| Ecosystem conservation through biocultural conservation approaches | Alison Ormsby | |
| Regeneration of Malagasy forests: A synthesis | Josoa R. Randriamalala | Dominique Hervé and Stéphanie M. Carrière |
| Ant diversity patterns across the tropics: from the soil to the canopy | Gabriela Camacho | Bonnie Blaimer and Ana Carolina Loss |
| Mangroves: A highly valuable ecosystem for the sustainable development of coastal areas in Madagascar | Dannick Randrimanantena | Blue Ventures |
| Synthesizing camera trapping data for tropical ecology and conservation | Lydia Beaudrot | Francesco Rovero |
| Bridging the divide: understanding tropical grassy biomes across Africa and Madagascar | Maria Vorontsova | Vonjison Rakotoarimanana and Caroline Lehmann |
| Bridging observations with models: understanding tropical forest ecosystems in a changing climate | Hannes De Deurwaerder | Matteo Detto and Marco D. Visser |
| The Interplay of infectious disease and biodiversity conservation | James P. Herrera | Patricia C. Wright |
| Sustainable tropical agroforestry: Balancing biodiversity and crop yield through ecosystem services | Luke L. Powell | Bea Maas |
